

The logo for AIRNET, featuring the word "AIRNET" in a bold, white, sans-serif font. The "A" and "R" are stylized with a double-line effect.

AIRNET

A detailed 3D rendering of a fiber optic assembly. On the left, a black cylindrical component is mounted on a white, multi-faceted metal housing. A bundle of fiber optic cables is connected to the housing. On the right, a large, clear, conical lens or protective cap is shown, with a circular inset providing a magnified view of the fiber optic cables inside. The entire scene is set against a dark blue background with a subtle light gradient.

production efficiency**

Point of use accessories

A comprehensive range of accessories for hooking up your compressed air network to the final point of use. The new point of use accessories are designed to complement the AIRnet piping system and provide end-to-end solutions for all your compressed air distribution needs.

These accessories are specifically introduced

- ✓ to ensure the highest efficiency of your distribution network
- ✓ to protect your downstream equipment
- ✓ to complement the performance of your compressed air equipment

Customer benefits

- AIRnet is now a one-stop solution for all your compressed air distribution needs
- All products are designed to ensure the optimum efficiency of your distribution network
- Full range of accessories to cater to all industry segments
- All products are manufactured according to EU standards ensuring highest reliability
- Strong distribution and service network across the globe

Filters and regulators

Excellent air quality for every application

Achieve maximum compressed air quality and outstanding working results with our filters and maintenance units – from prefilters and microfilters through to activated carbon filters.

Service units

Pressure regulators
