

Solid, simple and smart:
advanced reliability in compressed air

DRF 151-220 OIL-INJECTED SCREW COMPRESSORS

In an ideal world, you never have to think about compressed air. It just has to be there when you need it, as practical and cost-effective as possible. Ceccato's 150-220 hp screw compressors are designed and built to give you that essential combination of reliability and efficiency. Easy to install, use and service, you can count on the DRF 151-220 series to produce the quality air that keeps your production going.

Low operational costs

- Lower energy costs thanks to in-house designed, high-efficiency screw element.
- Up to 30% Variable Speed Drive energy savings.
- Helps you move toward a green production with lower emissions.
- Monitor and optimize your compressor remotely with ICONS.

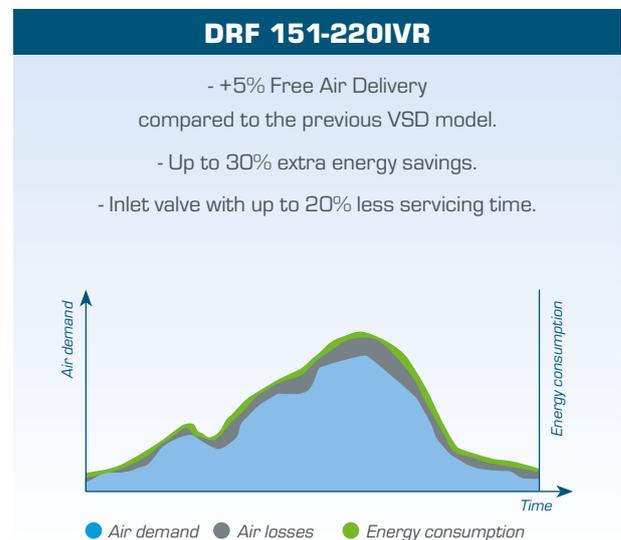

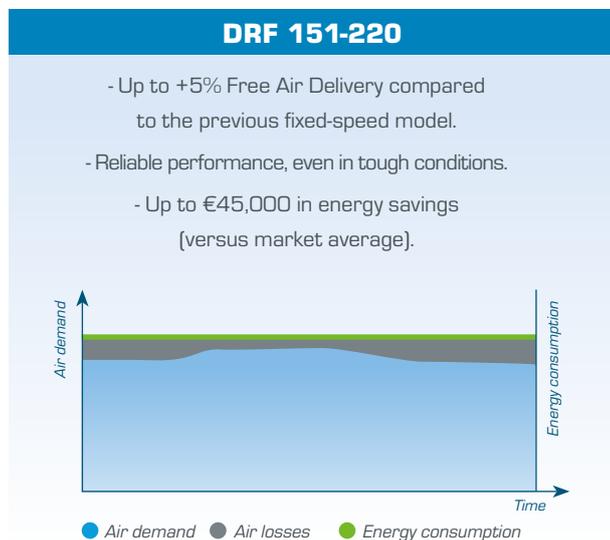

Always reliable

- Reliable operation, even in 46°C.
- The inverter's electrical cubicle can withstand up to 55°C.
- IP66-enclosed drive train for dependable performance in dusty and humid conditions.

A DRF 151-220 for stable and for fluctuating air demand

How you use your compressor greatly determines your operational costs. That is why our 150-220 hp series includes a fixed-speed model for stable air usage and a VSD version for fluctuating air demand.

Your steady, sturdy production companion

Focus on your core business

The DRF 151-220 will not let you down. From the outside in, it starts with a robust canopy that can withstand the hottest, dirtiest and dustiest conditions. Looking in, the DRF features maintenance-free components that ensure a higher uptime. Consumables with a long lifetime minimize downtime, as well as your operational costs.

Easy operation

We know you have no time to lose. That is why we designed the DRF 151-220 to be easy to use and service. The intuitive ES4000^T controller offers a host of air system management and monitoring options. The touchscreen gives you status updates and service alerts before performance becomes a problem. Servicing your DRF is just as straightforward and hassle-free. The service panels can be removed quickly for immediate access to all mechanical and electrical components to ensure swift maintenance with minimal downtime.

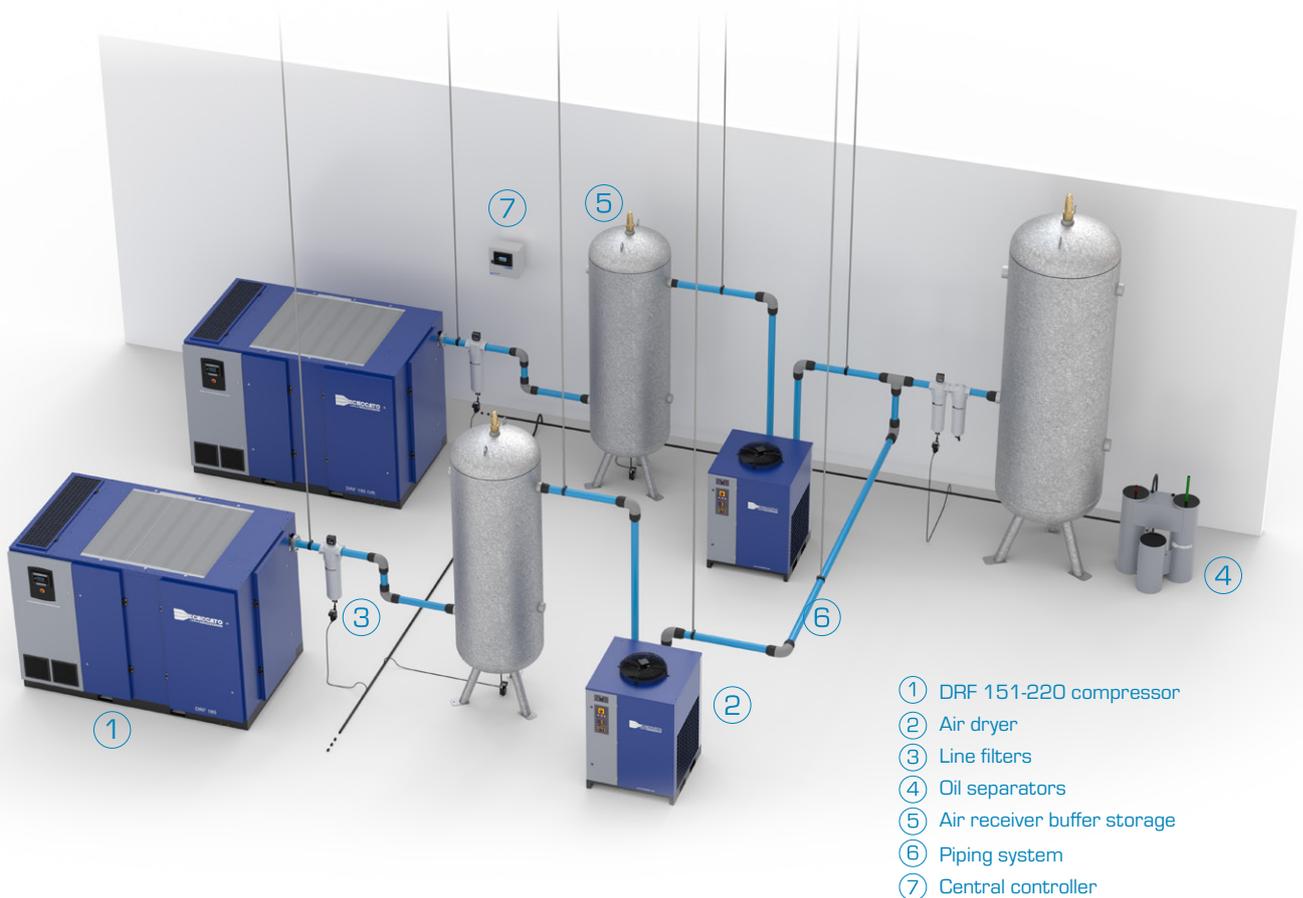

Variable Speed Drive for energy savings

If you have a stable compressed air demand, a fixed-speed compressor will work just fine for you. However, if your air use fluctuates during the day or week, a compressor always running at 100% will waste a lot of energy. Ceccato's DRF 151-220IVR Variable Speed Drive (VSD) compressors adjust their motor speed to follow your air demand as it goes up and down. The result: up to 30% energy savings. As energy takes up more than 70% of the cost of owning and operating a compressor, these savings quickly add up.

We've got your compressed air covered

Of course you want to get the most out of your DRF 151-220. Extend the Ceccato reliability and performance throughout your compressed air system.

ICONS

Increased reliability, powered by ICONS

With the **Intelligent CONnectivity System (ICONS)**, you get data and insights from your machines delivered to your computer, tablet or smartphone.

- Get **notified** by text or email whenever your machine requires your attention.
- Control your **maintenance costs** and ensure a longer machine life.
- Increase the **reliability** of your machine by identifying problems before they become a threat to the continuity of your production.

Boost your efficiency with the EControl6

Are you operating multiple compressors? Synchronize your machines and increase the reliability of your air supply with the **EControl6** central controller solution. One single touchscreen display gives you a host of air system management options. This includes narrowing down the operating pressure band for maximum energy savings. You can also equalize the running hours of your compressors to save on maintenance costs.

Save big with energy recovery

If you are looking to reduce the cost of owning and operating your compressor, energy recovery will probably have the biggest financial impact. Ceccato's energy recovery technology captures the waste heat of your compressor and uses it for water or space heating, industrial cleaning and sanitary facilities. Up to 75% of compression heat can be recovered, which means adding an energy recovery system to your DRF 151-220 will help you generate significant energy savings.

Inside the DRF 151-220

IE4 Super Premium Efficiency motor: Delivers energy savings of 30% on average; includes innovative oil-cooling technology for optimal performance in up to 46°C.

All-new compression element: Gives you improved Free Air Delivery and Specific Energy Requirement.

ES4000^T controller: Offers easy control thanks to its large 4.3" color touchscreen display in 30+ languages. Warning and service indications help keep your DRF 151-220 running optimally.

Available options

- Integrated energy recovery
- 8000-hour premium synthetic oil
- Food-grade oil
- Freeze protection
- Electronic water drain
- Heavy duty pre-filtration
- Water-cooled version

Warranty Service Package

With a Warranty Service Package, all your equipment needs are fully covered for up to 5 years. We take care of all your routine and non-routine services, so you can focus on your core business.

Enjoy **full warranty coverage** up to 5 years including expert on-time service, original parts and periodic upgrades.

By executing services efficiently and safely, we **avoid unexpected problems** before they arise, so you can benefit from the increased uptime of your compressed air installation.

By using original parts that are specifically designed for your compressed air installation, we **protect your investment** and ensure a higher efficiency and a longer lifetime of your machines.

Service packages can be customized and tailored according to your needs. Your local authorized service provider will be happy to provide you with more information.

CARE

Care is what service is all about: professional service by knowledgeable people, using high-quality original parts.

TRUST

Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

EFFICIENCY

Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference.
